Antidepressants are medicines used to treat depression and other illnesses. It is important to discuss all the risks of treating depression and also the risks of not treating it. Patients and their families or other caregivers should discuss all treatment choices with the healthcare provider, not just the use of antidepressants.

Antidepressant medicines have other side effects. Talk to the healthcare provider about the possible side effects of the medicine prescribed for you or your family member.

Antidepressant medicines can interact with other medicines. Know all of the medicines that you or your family member takes. Keep a list of all medicines (including prescription medicines, non-prescription medicines, vitamins and herbal supplements) to show the healthcare provider. Do not start new medicines without first checking with your healthcare provider.

What is REXULTI?
rexulti is a prescription medicine used to treat:

• Major depressive disorder (MDD): REXULTI is used with antidepressant medicines, when your healthcare provider determines that an antidepressant alone is not enough to treat your depression.

• Schizophrenia

It is not known if REXULTI is safe and effective in people under 18 years of age.

Who should not take REXULTI?
Do not take REXULTI if you are allergic to brexpiprazole or any of the ingredients in REXULTI. See the end of this Medication Guide for a complete list of ingredients in REXULTI.

What should I tell my healthcare provider before taking REXULTI?
Before taking REXULTI, tell your healthcare provider if you:

• have diabetes or high blood sugar or a family history of diabetes or high blood sugar. Your healthcare provider should check your blood sugar before you start REXULTI and during your treatment.

• have high levels of cholesterol, triglycerides, LDL-cholesterol, or low levels of HDL cholesterol

• have or had seizures (convulsions)

• have or had low or high blood pressure

• have or had heart problems or a stroke

• have or had a low white blood cell count

• are pregnant or plan to become pregnant. It is not known if REXULTI may harm your unborn baby. Using REXULTI in the last trimester of pregnancy may cause muscle movement problems, medicine withdrawal symptoms, or both of these in your newborn.

- If you become pregnant while taking REXULTI, talk to your healthcare provider about registering with the National Pregnancy Registry for Atypical Antipsychotics. You can register by calling 1-866-961-2388 or visit http://womensmentalhealth.org/clinical-and-research-programs/pregnancyregistry/

• are breastfeeding or plan to breastfeed. It is not known if REXULTI passes into your breast milk. You and your healthcare provider should decide if you will take REXULTI or breastfeed.

Tell your healthcare provider about all the medicines you take or recently have taken, including prescription medicines, over-the-counter medicines, vitamins and herbal supplements.
Call your healthcare provider if you have any of these symptoms of high blood sugar while taking REXULTI:

- feel very thirsty
- feel very hungry
- feel sick to your stomach
- feel weak or tired
- need to urinate more than usual
- feel confused, or your breath smells fruity
- increased fat levels (cholesterol and triglycerides) in your blood.
- weight gain: You and your healthcare provider should check your weight regularly.

- Unusual urges. Some people taking REXULTI have had unusual urges, such as gambling, binge eating or eating that you cannot control (compulsive), compulsive shopping and sexual urges. If you or your family members notice that you are having unusual urges or behaviors, talk to your healthcare provider.

- Low white blood cell count
- Decreased blood pressure (orthostatic hypotension). You may feel lightheaded or faint when you rise too quickly from a sitting or lying position.
- Seizures (convulsions)
- Problems controlling your body temperature so that you feel too warm. See “What should I avoid while taking REXULTI?”
- Difficulty swallowing that can cause food or liquid to get into your lungs.

The most common side effects of REXULTI include weight gain and an inner sense of restlessness such as feeling like you need to move. These are not all the possible side effects of REXULTI. For more information, ask your healthcare provider or pharmacist.

Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

How should I store REXULTI?

Store REXULTI at room temperature, between 68°F to 77°F (20°C to 25°C).

Keep REXULTI and all medicines out of the reach of children.

General information about the safe and effective use of REXULTI. Medicines are sometimes prescribed for purposes other than those listed in a Medication Guide. Do not use REXULTI for a condition for which it was not prescribed. Do not give REXULTI to other people, even if they have the same symptoms you have. It may harm them.

This Medication Guide summarizes the most important information about REXULTI. If you would like more information, talk with your healthcare provider. You can ask your pharmacist or healthcare provider for information about REXULTI that is written for healthcare professionals. For more information about REXULTI, go to [www.REXULTI.com] or call 1-800-441-6763.

What are the ingredients in REXULTI?
